## Chapter 1

### Feature: Stirrings of u-Japan

Introduction .....	5
Section 1: Use of Ubiquitous Networks by Individuals and Companies	
1. u-Japan .....	6
2. People's expectations for ubiquitous networks .....	6
3. Trend in corporate use of ubiquitous networks .....	6
4. Example use of ubiquitous networks .....	9
5. Japan's future challenges and solutions using ubiquitous networks .....	11
Section 2: ICT Use by Individuals	
1. Progress in ICT Use .....	12
2. Changes in people's lives .....	13
3. Stimulation of communication .....	14
4. Diffusion of online shopping, etc. ....	14
5. Increasing use of media contents .....	16
6. Comparison of ICT use in Japan, the United States, and the Republic of Korea .....	19
Section 3: ICT Use by Companies	
1. Enhanced use of ICT by companies .....	21
2. Expansion of E-Commerce .....	23
3. Comparison of ICT use among Japan, the United States, and the Republic of Korea .....	23
Section 4: Network Infrastructure Supporting u-Japan	
1. Progress of broadband .....	26
2. Progress of mobile communications .....	27
3. Progress of IP networks .....	27
4. Diffusion of terrestrial digital broadcasting .....	29
5. Japan's advantage in information and communications equipment and technology .....	29
Section 5: Challenges Toward Achieving u-Japan	
1. Safe and secure ICT use .....	31
2. Current status of the digital divide .....	37
3. Backbone circuit .....	37

## Chapter 2

### Current Status of Information and Communications

Section 1: Trends in the Information and Communications Industry, etc.	
1. Market size .....	41
2. Amount of added value .....	41
3. Employment .....	42
4. Productivity .....	42
5. Trends in ICT investment and contribution of informa- tion and communications to macro-economy .....	43

6. Capital investment .....	43	1. Promotion of the national ICT strategy .....	55
7. Information and communications ventures .....	43	2. u-Japan Policy .....	55
8. International trade and investment .....	43		
<b>Section 2: Telecommunications Business</b>		<b>Section 2: Development of Information and Communications Policies</b>	
1. Telecommunications carriers .....	44	1. Development of telecommunications policies .....	55
2. Telecommunications services .....	44	2. Development of broadcasting policies .....	56
3. Telecommunications rates .....	44	3. Promotion of policies concerning effective radio spectrum use .....	57
4. Status of use of telecommunications media .....	44		
5. Telecommunications networks .....	45	<b>Section 3: Upgrading Information and Communications Networks</b>	
6. Complaints and inquiries on telecommunications services .....	45	1. Promoting improvement of the network infrastructure .....	58
		2. Promoting advances in broadcasting .....	59
		3. Convergence of communications and broadcasting .....	60
<b>Section 3: Broadcasting Business</b>			
1. Broadcasters .....	46	<b>Section 4: Promoting ICT in Private Companies</b>	
2. Broadcasting services .....	46	1. Measures for improving credibility of electronic data .....	60
3. Status of broadcasting media usage .....	47	2. Establishment of environment for promoting the creation and growth of ICT venture companies .....	60
<b>Section 4: Postal Service</b>		<b>Section 5: Promoting ICT in Administration and Public Services</b>	
1. Finances of postal service .....	47	1. Promoting ICT in local areas .....	61
2. Volume of postal items .....	48	2. Accomplishing e-government .....	61
3. Post office network .....	48	3. Achieving e-local governments .....	61
4. Correspondence delivery business .....	48		
		<b>Section 6: Promoting Network Contents Distribution and Developing Human Resources</b>	
<b>Section 5: Contents</b>		1. Promoting the production, distribution, and preservation of network contents .....	62
1. Market size of the mobile contents industry .....	48	2. Developing human resources .....	62
<b>Section 6: Human Resources Development</b>		<b>Section 7: Protecting Information and Communications Users</b>	
1. ICT education in public schools .....	48	1. Consumer administration in telecommunications services .....	62
2. Development of ICT experts .....	49	2. Promoting measures for information security and privacy protection .....	63
		3. Overcoming the digital divide .....	64
<b>Section 7: Digitization of Homes and Companies</b>		4. Improving the environment for radio spectrum use .....	64
1. Digitization of homes .....	49		
2. Digitization of companies .....	49	<b>Section 8: Promoting R&amp;D</b>	
		1. Developing R&D policies in the information and communications field .....	64
<b>Section 8: R&amp;D</b>		2. Implementing selective R&D .....	65
1. R&D in the information and communications field .....	50		
2. Patents .....	50	<b>Section 9: Promoting International Strategies</b>	
		1. Promoting international policies .....	66
<b>Section 9: Trends Abroad</b>		2. Promoting international cooperation .....	66
1. Overseas national ICT strategies .....	51	3. Promoting international standardization activities .....	67
2. Usage status and market size of telecommunications worldwide .....	51		
3. Trends in overseas communications carriers and broadcasters .....	51	<b>Section 10: Development of Postal Administration</b>	
4. Trends in ICT policies in the United States .....	51	1. Efforts of Japan Post, etc. ....	67
5. Trends in ICT policies in the EU .....	51		
6. Trends in ICT policies in Asia .....	52		

## Chapter 3

### Trends of Information and Communications Policies

#### Section 1: Realizing a Society of Advanced Information and Communications Networks
