## 2012 White Paper on Information and Communications in Japan (Outline)

## Table of Contents

## Part 1

Special Theme: ICT-induced and accelerated Disaster Recovery and Japan's Re-birth

## **Chapter 1**

ICT — Keystone of Economic Growth Strategy, and Its Expansion into the Global Market

Section 1: Road to Success driven by ICT	. 2
1. ICT and Economic-growth and Development	
— How ICT drives it.	
2. Two Paths in ICT-driven Economic Growth	
3. Internet Economy Attracting Attention	. 2
4. ICT, for Easing Constraint-Conditions and	
Problem-solving for Japan	
5. Developing Countries' Ascent from Poverty and	
ICT's Role	
6. How ICT Contributes to Japan's Economic Growth	
7. Analytical Framework	
Section 2: ICT Market around the World	
1. Condition of Japan's Society and Economy	
2. Globally Expanding Growth Potentiality of ICT	
3. Developing Countries' Ascent from Poverty, and	
ICT	
4. Globally Acknowledged Growth-driving Force o	
Internet	. 5
5. ICT Strategic Activities promoted around the	
World	
Section 3: Growth Potential driven by Globalization of ICT	
1. Review of international indices for ICT	
2. Economic ripple-effects of ICT industries	
3.Competitiveness of Japan's ICT industries	
Section 4: "Problem Solution" through ICT Innovation	
1. Industry-by-industry Analysis of Growth Effect	
Information Capital Accumulation	14
<del>_</del>	n
of Contribution of Information Capital Accumulation to Economic Growth	15
3. Growth Accounting Analysis on ICT's Contribut	15
to Economic Growth	151
4. Towards Economic Growth through ICT	13
Investment and Utilization	15
5. ICT Utilization and Its Effects in Businesses	17
6. ICT Utilization in Education Sector and its Effect	18
7.Potentiality of ICT Utilization in Medical Sector	19
8. National ID System: Promises and Challenges	20
9. Users' Recognition of Public ICT Services	21
Section 5: ICT: Driving Force of Local Economy	
1. Effects on Local Economy Growth of Building and Glo	
Deployment of a New-type Community by All-round	
Application of ICT	22

Chapter 2:	Section 2: The Great East Japan Earthquake and Business Continuity54
Transformation of ICT Industries and Society,	1. Business continuity in disaster-damaged areas 54
induced and accelerated by "Smart Revolution"	2. Local governments' change in thinking after the
Section 1: "Smart Revolution" — ICT Paradigm Shift 25	Great East Japan Earthquake
1. Completion of "Ubiquitous Network" Environment	3. Private enterprises' change in thinking after the
and "Smart Revolution"	Great East Japan Earthquake
2. International Discussions: What the Cyber Space	Section 3: Lessons of the Great East Japan Earthquake and ICT 57
should be	1. Information conveyance in disaster-damaged areas and ICT
3. Counter Measures for Increasingly Severe Cyber	2. Information behaviors and usage of ICT in
Attacks and Challenges for Preservation of	
Information Security	neighboring areas
4. ICT — Creator of New Added-Value, Serving as a	after disasters
Knowledge and Information Infrastructure — and	Section 4: Enhancing anti-disaster ICT measures based on
Utilization of Big Data	lessons of the Great East Japan Earthquake 59
Section 2: "Smartphone Economy" — Transformation of ICT	1. Government measures
Industry Structure and User Behavior 28	2. MIC responses – Enhancing ICT's resistance to
1. New Competition and Growth induced by Rapid	disasters
Spread of Smartphone	3. Restoration and reconstruction from the Great
2. Coming Competitions among ICT Business	East Japan Earthquake
Eco-system and Overview	Buot Jupun Bui inquine
3. Changes in ICT User Behavior induced by	
Smartphone Spread	Part 2
4. Economic Ripple Effects of Spread of	
Smartphones/Tablet-terminals	Update on ICT and Policy Outlook
Section 3: Transformation of Media driven by the Completion of	Chantau A.
Digital Network43	Chapter 4:
1. Completion of the switchover to the digital	Current state of ICT
terrestrial broadcasting service, and the new	
expansion of broadcasting media 44	Section 1: ICT industry trends
2. Smart-TV and promotion of integration and	1. Economic size of the ICT industry 62
collaboration of broadcasting and social-media 44	2. ICT industry's economic spillover effects 62
3. Changes in users' recognition to the information	Section 2: ICT Industry Trends
media	1. Basic survey on the information and
Section 4: Towards the Steps for the New Growth by ICT 49	communications industry
1. International trends in "growth by ICT" and the	Section 3: Internet Usage Trends
difficult situation of Japan	1. Status of Internet diffusion
2. Economic Growth Driving Force and International	2. Harmful experiences associated with Internet use 64
Expansion of ICT Industries	Section 4: Cloud Service Utilization Trends
3. Challenges for ICT User Sector Growth 49	1. Status of cloud service utilization in Japan 65
4. The spread of smartphones and the growth of	Section 5: Telecommunications Sector
mobile industries	1. Telecommunications market
5. Realization of ICT Potentiality through the "Smart	2. Status of telecommunications services provision 66
Revolution"	Section 6: Broadcasting Sector
	1. Broadcasting market662. Status of broadcasting services66
Chanter 2.	Section 7: Radio Utilization
Chapter 3:	1. Status of radio utilization and the number of radio
Lessons of the Great Earthquake and the Role of ICT	stations
·	2. Protection of the electromagnetic environment 67
Section 1: Impact of the Great East Japan Earthquake on	Section 8: Content Market Trends
Information Behaviors	1. Present status of Japan's content market 69
1. Information behaviors and ICT's role in disaster-	Section 9: Research and Development (R&D)
damaged areas	1. Research in the ICT industry
upon the disaster	2. Technology trading

upon the disaster ...... 53

3. Number of researchers  Section 10: Postal Service and Correspondence Delivery Business  1. Postal service  2. Correspondence delivery business	71 <b>71</b> 71 71
Chapter 5:	
Outlook for Information and Communications Police	ies
Section 1: Promotion of a Comprehensive Strategy	74
Promotion of a national strategy      ICT policy approaches to realize a knowledge	74
information society	74
3. Development of cloud services	74
4. ICT productivity acceleration program	74
Section 2: Development of Information and Communications	
Policy	74
1. Development of telecommunications business	
policy	74
2. Development of broadcast policy	75
3. Development of radio policy	76
4. Handling of disputes between businesses in the	
fields of information and communications	77
5. Ensuring safety and reliability of infrastructure	77
Section 3: Ensuring Citizen's Lives are Safe and Secure	77
1. Consumer administration in relation to	
telecommunications services	77
2. Promotion of information security policy	78
3. Promotion of computerization in the fire safety a	nd
disaster preparedness field	78

Section 4: Improving the Quality of Citizen's Lives and the Natural Environment through ICT utilization	78
1. Promotion of ICT in the fields of education,	
medicine, etc	78
2. Regional development utilizing information and	
	79
3. Promotion of Content Distribution	79
4. Establishment of a barrier-free information	
environment	79
5. ICT contributions for global environmental	
problems	79
6. Development of ICT personnel	80
Section 5: Promotion of Computerization of Government	
Services	80
1. Realization of e-government	80
2. Promotion of e-local government	80
Section 6: Promotion of Research and Development (R&D) $\dots$	81
1. Promotion of Research and Development Strategy	81
2. Research and Development which Leads the Nex	xt
Generation	81
3. ICT International Cooperation Promotion	
Research and Development Program	81
Section 7: Promotion of International Strategy $ \dots \dots \dots$	82
1. Priority promotion issues in international policy	82
2. Initiatives in international frameworks	82
Section 8: Development of Postal Service Administration $ \ldots $	83
1 Dramatian of pastal sorving administration	00
1. Promotion of postal service administration	83
